PRESS RELEASE
Bauma 2025
SECMAIR
FAYAT GROUP

TOPSPRAYER LA

The know-how of SECMAIR is exported to South America;

Commercial presence in Colombia with a reach across Latin America from Mexico to Chile, development of a network of local partners that can provide advice and service, the year 2024 was the year of SECMAIR's establishment on the South American market.

To best meet the expectations of this new market, a spreader, TOPSRAYER LA has been designed for the tack coat and surface dressing jobsite.

Compatible with most European or American trucks, the TOPSRAYER LA are designed, manufactured and tested in our workshops of Cossé le vivien then adapted to the trucks on site by our local partners.

Composed of a tank of 8000 l, equipped as standard with a 4.8m foldable spraybar, a hand lance, a direct heating system and an on-board computer with cabin control station, it allows to combine efficiency, precision and robustness.

The first TOPSRAYER LA are already in service on the roads of Mexico, Peru and Chile.

About SECMAIR

Secmair, a Fayat Group Company for almost two decades, is the Euopean leader for developing and manufacturing road maintenance machinery since 1981. Featuring the most complete line of road maintenance equipment, from surface dressing to cold mix asphalt, as well as crack bridging and pothole treatment, SECMAIR is positioned to offer a solution for every road maintenance requirement. SECMAIR one single production site constitutes a unique platform to guarantee state-of-theart product industrialization alongside transversal components, ensuring outstanding reliability and first-class after-sales services.
